# How to create a Shortcut on Your Homepage in 3 Easy Steps

If you visit a particular website quite often, you may find that you could benefit from placing a shortcut to that website right on your homepage. Creating a shortcut is easy, and makes navigating to your most visited pages easy. The following slides will explain how to create a website shortcut on your homepage.

## Step 1

Open Safari (your Apple device's internet application) and navigate to the page that you wish to create a shortcut for.

After the page loads up, tap the Share button at the bottom of the screen.

## Step 2

A list of options will open, tap “Add to Home Screen”

## Step 3

You will now be able to change the name of your shortcut as it will appear on your HomePage.

## Step 4

After you have typed the desired name, tap “Add”. Your shortcut will be added to your Homescreen immediately!

Now you can access that website with just a tap of the icon! You can create these shortcuts for as many websites as you like.
