

Import screenshots from your iPhone to your PC Windows 8

If you are confused about how to import photos from your Apple iPhone to your Windows PC here is a quick how-to to give you some clarity. It will show you how to quickly and easily transfer and use those photos without the hassle of emailing each photo to yourself.

Step 1

Connect your iPhone to your desktop using appropriate USB cables. Note you may have to install the driver if you have never connected this device before

Step 2

Now you will want to look under Devices and Drives on your PC, right-click on the iPhone device, and select the option to Import Pictures and Videos

Step 3

Before you import your photos you may want to decide on the folders you would like your photos to end up in. To do this, you will click the More Options link which will bring up your Import Settings.

Step 6

Now you can either choose the Select All option on the screen or sort through your groups and pictures, individually choosing which ones you want to import. Once you have finished you will click on the Import button.

Step 7

You did it! Now, depending on how many photos you selected, you will wait for the import to complete. Once done all your desired photos and screenshots will be available on your PC, Enjoy!
