[iOS 8]

How to use the timer on the camera app on your iOS device

With every new update to their iOS, Apple brings up new features for users to take pleasure in. In the iOS 8 version, the camera app got a timer feature that adds an option to take delayed photos by using an in-built timer.

Step 1 -

First, open the camera app by tapping on camera in the apps menu.

Step 2 -

Next, tap on the clock icon on the top of the screen.

Step 3 -

After that, choose your preference on how much time you want for the camera to wait before taking a picture. You can choose to leave it off or have a delay of 3 or 10 seconds.
