Use Snapchat for iOS

If you aren't familiar with this neat piece of iOS software, Snapchat is a way for you to send pictures or videos (or snaps, if you feel like it) to your friends and colleagues. The 'snap' will delete itself automatically unless the person you sent it to takes a screenshot of it.

Step 1 - Download 'SnapChat'

First, download Snapchat by going to the download page on the Apple Store.

Step 2 - Sign up

After you start the application, sign up by tapping on Sign Up with your personal info.

Step 3 - Find Your Friends

Next, you will be taken to the Find Friends section, tap on Continue.

Step 4 -

After that, a query will appear by Snapchat asking you if it can access your Contacts – tap OK. Same goes for the notifications pop-up query.

Step 5 -

Once that is done, if you want to take a snap, tap on the camera button and then tap on the big circle to take the picture.

Step 6 -

When you are satisfied with your picture, tap on 'Tap to Add Caption' and add your caption (or message)

Step 7 -

By default, the snapchat you send to a person auto-deletes 3 seconds after it was viewed. To change this, tap on the timer icon in the bottom left and choose your preference (1-10 seconds).

Step 8 -

Once you've set-up the auto-delete and the caption, tap on the arrows in the lower right corner to send your snapshot.
