

Crashing and Random Rebooting Fixes

07.24.2015

iPhone 6, iOS 8

Overview

From time to time you will find that your iPhone has either crashed or is not functioning the way it has before. There are various ways to resolve such problems.

Solution 1 - Restart your iPhone

Switch off your iPhone by pressing the 'Sleep/Wake' button and the 'Home' button at once. Restart it in the same way after a while.

Solution 3 - Drain and Charge the Phone

Drain the Battery Completely and then Recharge it to 100%.

Solution 4 - Reset your phone

This should be your last option. Backup all of your Data.

Go to Settings > General > Reset > Tap on Reset All Settings and then Confirm.

Solution 5 - Update iOS

Make sure you have updated your iPhone software to latest available version.
